

MSC-MOD

Add variable-rate using your existing PWM compatible controller!

- Compatible with ANYTHING that puts out a PWM signal!
- Replaces a regulating valve

PWM Controllers come with all the wires necessary for connection to existing wire harness, and two adapter wires. The T-Taps and spade connectors are also included.

| Part # | Description |
|-----------|--|
| MSC30-DD | 12V Motor Control; <u>Digital Gauge</u> (30 amp) |
| MSC30-NG | 12V Motor Speed Controller; <u>No Gauge</u> (30 Amp) |
| MSC30-SSG | 12V Motor Control; 60lb <u>SS Gauge</u> (30 Amp) |
| MSC-MOD | PWM 12V Motor Speed Control; (30 AMP) |
| 217012 | Replacement Pressure Transducer for MSC30-DD |
| 215650 | Motor Cable (15 Feet) |
| 215651 | Motor Cable Extension |
| 215652 | Battery Cable (10 feet) |

MSC30-DD

Remote Pressure Transducer included - Can be mounted anywhere within 20 feet of controller. (Extension cables available for longer distances.)

MSC30-NG

“Customize” your output by adding a 12-Volt Motor Controller

- Controls motor speed on any 12-volt pump
- 30 Amp Max.
- Mounts right in the cab for quick and easy access
- No Messy or Smelly liquids in your cab
** (Does not apply to MSC30-SSG Model)
- Engineered for guaranteed performance when you need it
- All units fully tested before being shipped
- Full one year limited warranty***
- Kits Available for Easy Installation
- Volume Discounts Available
- Customize the Label by adding Your Company Logo (minimum purchase)
- Implement Switch Ready and available by request

To avoid repairs not covered by warranty and to insure optimum performance, it is critical that the correct wire be used; therefore, we highly recommend that you also order the motor and battery cables.

MSC30-SSG

Clear Markings for Easy Installation

Fuse protects the unit from power overloads and has easy access.

High quality weather-tight connectors.
