	40	2.0	16 ft.	31	21	16	12	10	9	

The Acreage Pro comes in two trim levels, **Standard** and **High-Flow**.

The **Standard Acreage Pro** features a 4.0 gallon per minute pump with Boominator 1160 tips. These tips will deliver 9 gallons per acre at 4 miles per hour and 30 PSI. This is a great rate for most applications at a speed that is easy to manage over rough ground.

If you want to drive faster, we recommend the **High-Flow Acreage Pro**. It has a larger 5.5 GPM pump with Boominator 1250 tips. This allows you to achieve a solid 10 GPA application rate at 5 to 6 MPH in that same 30 PSI range. It's a great option for people who have larger properties with smoother ground. Or anyone that just likes to drive fast.

The BENCO Warranty

Every BENCO Sprayer comes with a one year warranty. The BENCO difference is that we stand behind our products long after the warranty expires. We want to know what issues our customers have so we can help them solve those problems. This feedback helps us design better and better products with more features that last even longer than those we make today. The warranty is one year. The support will last for a lifetime.

The Little Sprayer with BIG Performance

Pro Boomless Spraying.

Professional Boominator stainless steel tips give 16' of even coverage on each side of your UTV for a full 32' coverage area. Manual shutoffs behind each tip allow for left or right fenceline spraying.

Good boomless tips make spraying easy. Boomless nozzles allow you to cover more ground with each pass without ever having to worry about hills, uneven ground, or obstacles (like those jumping fence posts). They are ideal for pastures & lawns.

When you are done spraying, the boom folds up out of the way for easy handling and storage.

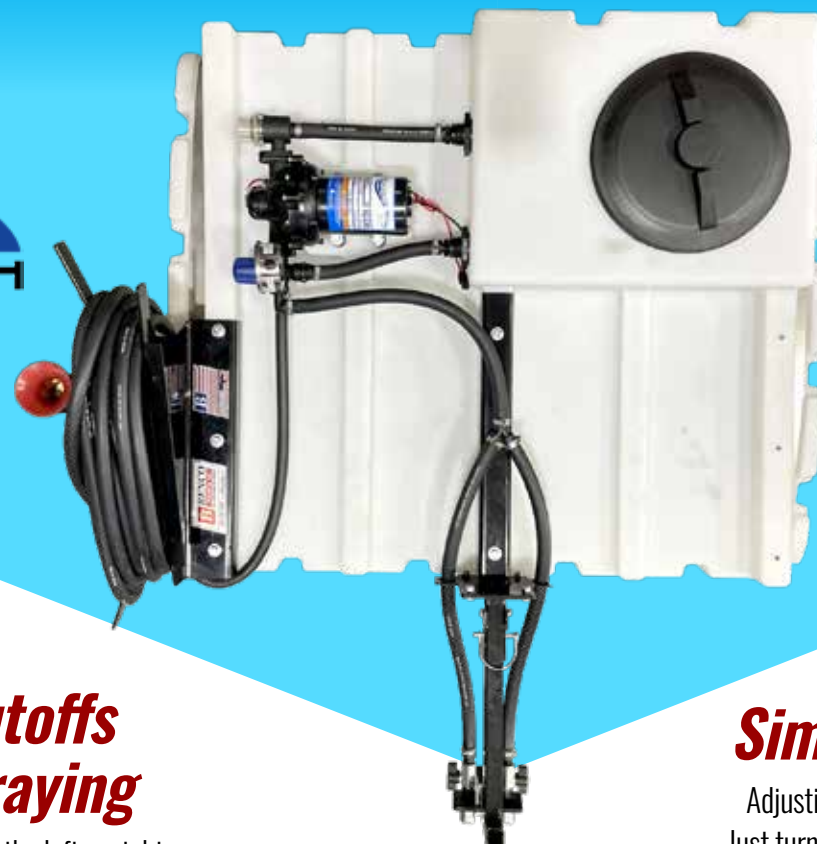

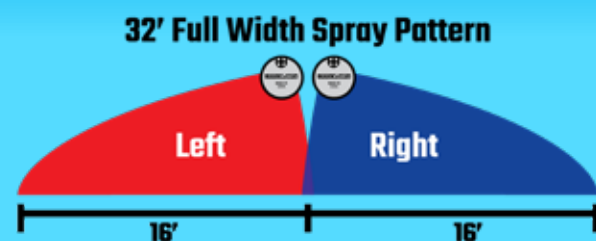

Tough. Simple. Dependable.

The BENCO difference is quality and durability. Making superior machines that are both durable and easy to use doesn't just happen. It takes thoughtful engineering. BENCO's entire sprayer line work better because we sweat all the little details to ensure they are the best sprayers available anywhere.

BENCO's total-drain tanks sit low in their frame for maximum stability and excellent visibility. BENCO tanks are extra thick and feature stiffening ribs throughout for increased longevity and durability.

In Short, BENCO's obsessive attention to detail makes our sprayers the best built, best engineered, and best value on the market today.

Professional Spray Gun

Heavy-duty professional spray gun is built from stainless steel and rugged plastic for years of reliable use. The SG-2200 spray gun can spray over 30 feet and adjusts from mist to stream back by the trigger, keeping your hands dry and chemical free.

Left & Right Shutoffs for Fenceline Spraying

Simple manual valves can turn off either the left or right nozzle so you can spray fencelines with ease.

Simple Pressure Control

Adjusting pressure is easy with the BENCO Acreage Pro. Just turn the blue knob under the pressure gauge to dial in the perfect pressure for your application rate.
